Narola Infotech

INTERNSHIP

6 Months — E-commerce Project
Narola Infotech

During the internship period I've Worked on Core PHP and later Laravel framework. In Laravel, I've done project including Todo app and E-commerce Project.

Projects

3 Months

Conventionhosts

Developing a platform for customers to book models for events, with modules for Admin, Agency, and Model. Integrating Stripe for secure payments, enabling payouts to models, agencies, and customers. Implementing real-time booking status notifications (accept/reject) to enhance user experience.

2 Months

Youtextme

Developed and maintained a CMS-based website for an SMS app, enabling dynamic content updates. Worked on authentication APIs for the app, supporting user registration through the website and offering a free 1-month ad-free membership upon sign-up.

3 Months

Health care

Benefitting doctors, patients, and hospitals, The healthcare project simplifies record-keeping, enabling easy access to appointments, patient history, and vital information for efficient collaboration and workflow management.

2 Months

AllCoating Project

In the AllCoating project, I focused on inventory management, ensuring seamless deduction of quantities upon order placement and restoration upon deletion, leveraging Laravel for efficient order management.
